Work Experience

Comcast, Chennai Jul 2024 - Present
Software Development Engineer 2

- Spearheaded development of Comcast's internal asset management portal “**Linx**”, saving the company **\$6M+annually** by replacing multiple third-party tools including ServiceNow.
- Led the design and implementation of the **Asset Lifecycle Management (ALM)** module with 5+ dynamic forms and integrated advanced grid features (filtering, sorting, column swap) for asset onboarding and tracking.
- Delivered a **role-based access system** supporting 7–8 user roles with granular permissions, improving platform security and user experience.
- Built **bulk upload features** using xlsx for assets and parts, increasing onboarding speed by 5x for business partners and internal users.
- Developed the **Vendor module** enabling external business partners to manage parts, company profiles, documents, and points of contact through intuitive forms and data views.
- Integrated an **interactive map with OpenStreetMap**, showing asset distribution across US data centers with drill-down filters by division, region, and site, boosting operational visibility.
- Created a **calendar view**, dashboard summaries, and pricing comparison screens to support quarterly planning and maintenance scheduling.
- Added **Favourite functionality** with persistent quick links, enhancing user navigation across modules.
- Worked closely with backend and design teams to align UI/UX and API integration, delivering scalable, reusable components across modules.
- Collaborated directly with the **product team** to gather requirements from epics/stories, define development tasks, and estimate effort; presented **weekly demos** to stakeholders and participated in all Agile ceremonies.
- React.js, Redux, Redux Thunk, React Hook Form, MUI, AG Grid, OpenStreetMap, JavaScript (ES6+), HTML5, CSS3, XLSX, File Upload/Download, Role-Based Access Control (RBAC), Git, Azure DevOps, Postman, Agile Scrum, API Integration, Form Validation, Bulk Upload, Cross-Functional Collaboration

Cognizant, Chennai Jul 2021 - May 2024
Associate

- Developed and maintained 20+ React + Redux components, ensuring optimal performance and 100% reusability across modules.
- Reduced website load time by over **30%** using advanced techniques like **code splitting** and **lazy loading**, improving overall UX.
- Achieved **85%+ test coverage** with **zero code smells** in SonarQube, significantly decreasing QA turnaround time.
- Maintained a shared **JWT authentication library** supporting 7+ teams, streamlining cross-team security practices.
- Led 10+ **knowledge transfer (KT) sessions** for new team members, accelerating onboarding and project readiness.

Education

R.M.D Engineering College, Chennai Sep 2017 - Jun 2021
B.E. in Electrical and Electronics Engineering **CGPA: 8.2/10**
G.V Higher Secondary school, Salem 2017
H.S.C 94.30%

Positions of Responsibility

- Took end-to-end ownership of multiple modules (ALM, Vendor, Maintenance) in the Linx portal, from requirement analysis to final delivery.
- Collaborated directly with the product team to break down epics and user stories, create development tasks, and estimate level of effort.
- Led weekly product demos and acted as the primary frontend liaison between engineering, product, and QA teams.
- Designed and maintained shared components and utilities for consistent UX across modules, influencing overall frontend architecture.
- Mentored new team members on portal structure, codebase, and technical practices, ensuring fast onboarding and team velocity.
- Acted as **Point of Contact (POC)** for the Frontend of the Account Microservice, coordinating with backend, QA, and UI/UX teams.
- Conducted 10+ KT sessions and led defect resolution efforts for sprint sign-off, supporting cross-team collaboration.

Awards and Certificates

- **Spotlight Award** at Comcast for consistently delivering high-impact features and contributing to cross-functional success on the Linx portal project.
- **Promoted to Associate** at Cognizant within 2 years, based on exceptional performance and technical contribution.
- Received **Sapphire Award** for completing quarterly deliverables without delay for 4 consecutive quarters at Cognizant.
- Part of the team that won **Best Team Award** among 10+ teams for consistent delivery without escalations.
