Skills

- Python, EDA, scikit-learn, Generative AI, React, RAG, Node.js, Redux, Docker, Javascript, Fast API, Git, NumPy, Google Colab, Machine Learning, Agentic AI

Experience

Engineer 2, Comcast

Jul 2024 - Present

Comcast | *Software Development Engineer 2 (Jul 2024 – Present)*

- **Jira Integration (Node.js & React):** Architected and deployed an end-to-end ticketing integration within LinX using Node.js and React, allowing external partners and internal users to directly create, track, and manage Jira issues without leaving the portal.
- **Data Integrity & Asset Scorecard:** Designed and implemented an Asset Scorecard module to evaluate data accuracy and completeness across data center sites, driving operational data governance and identifying integrity gaps in real time.
- **Attribute & Metadata Architecture:** Architected a metadata-driven attribute catalog system to serve as the single source of truth for dynamic asset definitions, standardizing API contracts and simplifying dynamic UI form rendering across modules.
- **User & Group Assignment Management:** Built an automated Assignment Group management subsystem, streamlining user permissions, ticket routing, and asset ownership delegation for complex operational workflows.
- **Centralized Role-Based Access Control (RBAC):** Engineed a platform-wide RBAC authentication and authorization system supporting **7–8 granular user roles**, enforcing strict context-aware UI rendering and secure API access controls across all LinX microservices.
- **Core Module Engineering (ALM & Vendor):** Built key components of the Asset Lifecycle Management (ALM) and Vendor modules using React, Redux, and AG Grid, implementing bulk data operations (xlsx) that accelerated data onboarding velocity by **5x**.
- **Geospatial & Data Visualization:** Integrated interactive OpenStreetMap features for tracking US data center asset distribution with multi-level drill-downs by region, division, and site.
- **GenAI / AI Innovation (PoC):** Driving R&D initiatives to introduce intelligent system capabilities into LinX, developing Proofs of Concept (PoCs) using Retrieval-Augmented Generation (RAG) and Text-to-SQL LLM pipelines to enable natural language querying over complex enterprise asset data.
- **Technical Leadership & Agile:** Led epic breakdowns, technical design docs, and weekly stakeholder demos, acting as the primary frontend technical lead across backend, QA, and product management teams

Associate, Cognizant

Jul 2021 - Jun 2024

Cognizant | *Associate (Jul 2021 – May 2024)*

- **Frontend Optimization:** Architected and maintained **20+ reusable React/Redux components**, cutting page load times by **>30%** via code splitting, dynamic imports, and lazy loading strategies.
- **Code Quality & Security:** Maintained higher than **85% unit test coverage** with zero SonarQube code smells, substantially accelerating sprint QA turnaround and deployment reliability.
- **Core Shared Infrastructure:** Owned and maintained a cross-cutting shared JWT authentication library consumed by **7+ engineering teams**, unifying security standards across services.
- **Module Ownership:** Served as the primary Frontend Point of Contact (POC) for the Account Microservice, directing defect resolution and coordinating release sign-offs across cross-functional teams.
- **Mentorship & Onboarding:** Conducted **10+ knowledge transfer (KT) sessions**, onboarding new developers and reducing team ramp-up time.

Education

R.M.D ENGINEERING COLLEGE, B.E

2021

Achievements

Recognitions & Awards (Comcast)

- **Runner-Up – Lean Into Action (LIA) Competition (2025):** Designed and prototyped a centralized Data Center Sustainability Dashboard tracking Scope 1, 2, and 3 CO_2 emissions across electricity usage, hardware assets, and commuting logistics.
- **Spotlight Award (Q1 2026):** Recognized for exceptional engineering contributions directly driving the successful production release and stabilization of the LinX platform.
- **Sapphire Award (2025):** Awarded for outstanding individual quarterly contributions and technical execution.
